

# TRANSLATING TWOQC'S WEBSITE CONTENTS

The statistics for our website show that we have readers from around the world. Yes, TWOQC is viewed in other countries. Hard to believe? But very real.

Our webmaster, Marianne, added the "translate" tool at the top of the left sidebar to allow viewers to automatically translate our site content into any language that is supported by Google Translate, which is just over 100 languages.

Try it out! You can easily switch back to the English version with a simple "click". The translation only applies to website text and not embedded graphics.

**TIP #1:** The Google Translate feature is rated as "decent", and can be good if you already know the grammatical rules of your target language.

**TIP #2:** The Google Translate feature is viewed best on a larger screen (computer, laptop). The feature is not adjustable for a smaller screened devices (smartphone) therefore the languages to the "right" of the selection screen may cutoff.
